

Specialty Seals

IS9010

An overhead drip guard designed to channel rain water away from exposed doors, particularly those which open outward.

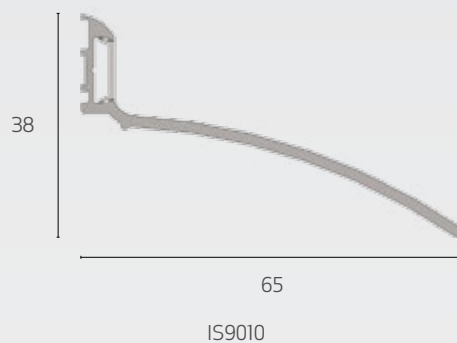

An aesthetic PVC cover strip conceals the screw line. Suitable for single and double leaf doors, sliding doors, roller shutter doors, plus tilt-panels.

Standard lengths

- 1000mm
- 2250mm
- Also available in: 250mm increments from 1000mm to 3000mm

Standard colours

- Silver anodised aluminium with grey PVC cover strip

Right: Application showing the IS9010 fitted to a steel door frame above an outward opening door.
