

Dual Lock Lever Handle – DLLH 33 T

The **Dual Lock Lever Handle Turn Snib** has been designed and developed exclusively for single lever action to open dual lock doors. This innovative technology offers a single lever that activates both locks simultaneously in one smooth action. This overcomes the existing problem of having to use a double handed action with dual locks to open a door.

The standard DLLH-33 has been enhanced to incorporate a turn snib (DLLH-33 T) which allows the top deadbolt to be activated internally via the turn snib. This does not affect the single downward action of the handle which will release both locks simultaneously.

RECOMMENDED APPLICATIONS

Any door that requires dual locking such as:

- Secure Rooms
- Commercial offices
- High security buildings
- Critical infrastructure
- Airports
- Universities and schools
- Hospitals
- Major Utilities

FEATURES

- Compatible with most quality Australian mortise locks and latches
- Heavy duty lever return spring
- Concealed fixing from outside
- Smooth lever handle operation

TECHINICAL SPECIFICATIONS

Door thickness:

- Screws and spindles supplied to suit doors with a 32mm-50mm thickness (standard)
- Plate furniture - 390mm long x 50mm wide x 12mm depth
- Extended screws and spindles can be supplied on request
- External furniture additional
