

Smart Locks

The premium digital locking solution for flexibility and peace of mind.

Imagine the possibilities

At Yale, we offer Smart Home security solutions so that you can protect the people and things you love. With over 180 years of security expertise, we are committed to innovation and are constantly expanding our global product offerings.

The key to our success has been using the latest software and hardware advances along with a firm commitment to protecting data security and privacy for our customers.

Yale Home is a mobile app that lets you access and manage your Yale smart products from your mobile. The Yale Home App allows you to lock and unlock your door, share access with your family and friends, view access history, receive notifications on the lock's activity and check the lock's battery life.

The Yale Home App works alongside the Yale Connect or Connect Plus Wi-Fi Bridge so that you can see your lock's status and remotely operate it from wherever you are in the world.

Yale Home

Grant entry from wherever you are

When your Yale Smart Lock is paired with Yale Connect or Connect Plus Wi-Fi Bridge, you can use remote access from anywhere in the world to let in family, friends or trusted visitors like the cleaner or dog walker. If someone forgets to lock up when they leave, you can easily take care of it with the tap of a finger.

Auto-lock and unlock as you come and go

The Yale Home App auto-lock feature can automatically lock your door when you leave, either immediately after closing or after a set amount of time. When you return, your door will auto-unlock using geofencing technology, so you don't need to fumble around for your keys.

Know the ins and outs of your home

The 24/7 activity feed will help you check who is coming and when - even when you're not there. You'll know when guests have arrived, what time your children got home, and whether a tradesperson or the cleaner was there to get a job done.

Expecting guests? Send a virtual key

From the Yale Home App, you can send virtual keys to friends, family or people you trust. Guests can come and go as they wish without you having to worry about lost keys.

Use your voice to control your lock

Yale Home works with Amazon Alexa, Apple HomeKit and Google Home. You can control your lock with your voice using Alexa, Siri or Google Assistant.

Unity Entrance Series

Working every day since 1840, Yale continues to bring you seamless solutions for entering your home, without the hassle of searching for your keys. The Unity Entrance Series includes the Unity Entrance Lock and the Unity Security Screen Door Lock and is your answer to seamless home entry.

When installed with a Yale Connect Plus Wi-Fi Bridge, the Unity Entrance Series features DualDoor™ Technology*. With a single command, users can operate both the security screen door and the main entrance door together. The door lock or unlock command operates both locks (Unity Security Screen Door Lock and Unity Entrance Lock) in a sequence.

The Yale home ecosystem can integrate your Unity Security Screen Door Lock and Unity Entrance Lock together to operate both locks with a single command. The technology works seamlessly, to provide ultimate user convenience. This will allow the user to enter the home without keys and saves the effort of operating the screen door and main entrance door locks together.

The Unity Entrance Series works with the Yale Home App, giving you total control over your lock via your smart device. You can grant access to others, keep track of visitor access and so much more.

You can also add accessories to the Unity Entrance Series, such as the Yale Smart Keypad** to enable PIN code access on your lock.

*DualDoor™ Technology requires pairing the Unity Security Screen Door and Unity Entrance Locks with Yale Connect Plus or two Yale Connect Bridges (one per lock) to operate.

**Yale Unity Entrance Lock, Connect Plus and Smart Keypad sold separately.

Yale Home App

Yale Smart Locks are managed through the use of the Yale Home App - giving you total control over your lock via your mobile device.

Works with

Download the free Yale Home App on iOS and Android.

Yale Unity Security Screen Door Lock

The Unity Security Screen Door Lock provides seamless entry into your home. It can be paired with your Unity Entrance Lock so that once your screen door unlocks, so too will the the entrance lock*.

DualDoor™ technology

Gain seamless entry when paired with your Yale Unity Entrance Lock and Yale Connect Plus.* Once your security screen door unlocks, your front door will too.

Tailor user access

Use the Yale Home App, Contactless Key Tags or upgrade with the Yale Smart Keypad** to access your lock

Auto unlock/lock

Auto unlock your door as you walk up to it, without the need to take out your phone. The integrated door position sensor tells you if your door is open or closed.

*DualDoor™ Technology requires pairing the Unity Security Screen Door and Unity Entrance Locks with Yale Connect Plus or two Yale Connect Bridges (one per lock) to operate.

**Yale Unity Entrance Lock, Connect Plus and Smart Keypad sold separately.

Unity Security Screen Door Lock

Gone are the days when you have to search around for your keys. Now you can control your front door and your security screen door with the Yale Home App, contactless key tag or Yale Smart Keypad*.

With Yale Home you can:

- Lock and unlock your door via your mobile device
- Grant access to others for one time access
- Grant access for a set period of time or a date range
- Keep track of visitor access

Think of the times when you walk up to your front door and have to search your bag or pockets for your house keys. Now imagine walking up to your front door and your lock unlocks the door as you approach!

Using multiple technologies including Bluetooth, Wi-Fi and GPS, as well as the Yale Home App, the auto unlock feature unlocks your door as you approach.

The Unity Security Screen Door Lock has patented digital deadlocking technology, locking both the internal and external handles of your lock when using your smart device or contactless key tag.

Need a premium security solution? An optional 3 point lock kit is available with your Unity Security Screen Door Lock. Activating these auxiliary locks is as simple as lifting the lever.

Lock alert indications show users the lock mode via an inbuilt LED. The lock has three modes: Unlock (green), Locked (yellow) and Secure (red). You can also press the internal electronic button to lock and unlock from the inside.

The inbuilt door position sensor checks the status of the door and tells you if your door is securely closed and locked. This avoids inadvertently locking your door while the door is open.

The Unity Security Screen Door Lock works with Amazon Alexa, Apple HomeKit and Google Home. You can control your lock with your voice using Alexa, Siri or Google Assistant.

The Unity Screen Door Lock meets Australian lock standards AS4145.2:2008, SL6 and D7.

Available in Silver and Matt Black finishes.

*Yale Connect Plus Wi-Fi Bridge and Smart Keypad sold separately.

Unity Entrance Lock

Designed specifically for the Australian market, the Unity Entrance Lock has patented digital deadlocking technology allowing you to lock both the internal and external handles on your door.

The Unity Entrance Lock has three modes: Unlock (green), Locked (yellow) and Secure (red) - all indicated by an inbuilt LED light.

Controllable by either your Yale Home App, Contactless Key Tag or the Yale Smart Keypad*, the Unity Entrance Lock provides you with a range of options to control your lock.

The Yale Home App allows you to lock and unlock your door, grant access to others and keep track of visitor access, all via your smartphone. Grant users one-time access, access for a set period of time or a date range and avoid any lost, stolen or copied keys.

Using Bluetooth, Wi-Fi, GPS and the Yale Home App, the auto unlock feature unlocks your door as you approach it.

The Yale Unity Nexion Retrofit Kit* offers customers the option to upgrade the Lockwood Nexion Mechanical and Nexion Keyless Entrance Locksets to a Yale Unity Entrance Lock. This includes a latch and 3 sizes of strike plates to cover 35-45mm thick jamb. With their metallic finish, the latch and strike plates ensure a clean, high-quality appearance. The latch and strike plates are also designed to accommodate Yale Unity's door position sensor.

This door position sensor checks the status of the door and tells you if your door is open or closed, giving you the peace of mind that your door is secure when locking up.

The Unity Entrance Lock can be upgraded using the Yale Connect or Connect Plus Wi-Fi Bridge*. This allows you to access your lock from wherever you are in the world. Remote features include the ability to lock, unlock, manage user access and update lock settings.

The Yale Connect Bridge enables integration with your Google, Samsung or Alexa smart home hubs. The Unity Entrance Lock is also Apple HomeKit compatible (see Lock Compatibility Table on p.29 for details).

With the Yale Smart Keypad*, you can lock and unlock your door via PIN codes.

The durable metal Yale Unity Installation Template* is tradesperson friendly - particularly where multiple or ongoing installations are required.

The Unity Lock meets Australian lock standards AS4145.2:2008, SL8 and D8.

Available in Silver and Matt Black finishes.

***Yale Connect, Connect Plus Wi-Fi Bridge, Yale Smart Keypad, Yale Unity Nexion Retrofit Kit and Yale Unity Installation Template sold separately.**

NOTE: Yale Unity Nexion Retrofit Kit not suitable for use on fire door applications.

Unity Series Accessory - Connect Plus Wi-Fi Bridge

Designed to support up to 16 Yale Home smart devices throughout your home, the Yale Connect Plus Wi-Fi Bridge keeps your devices connected and power points free.*

The Connect Plus Bridge allows you to access and manage your Yale Home smart devices remotely.

The Connect Plus Wi-Fi Bridge works with your smart home and can easily be integrated into your home automation system. This gives you the option of turning on your lights when your door unlocks or even playing your favourite song when you walk through the door.

The Yale Connect Plus Bridge is compatible with voice assistants - easily integrate it into your Google, Samsung or Alexa enabled smart home devices.

Features and Specifications

- Support for 16 Yale Home smart devices
- Expand the capabilities of your Yale Home by enabling new features including DualDoor™ Technology**
- Seamlessly manage your Yale smart devices from anywhere using the Yale Home App
- Enables smart home connectivity with Google Home, Amazon Alexa, Samsung SmartThings
- Simple app-driven set-up process

*Home size, layout and building material can impact performance. Medium and larger sized home may require additional devices for full coverage

Unity Series Accessory - Yale Unity Nexion Retrofit Kit

The Yale Unity Nexion Retrofit Kit* has been designed to offer you the option to upgrade the Lockwood Nexion Mechanical and Nexion Keyless Entrance Locksets to a Yale Unity Entrance Lock.

The Kit includes:

- Retrofit latch plate
- Retrofit strike plates (3 sizes, covering 35-45mm thick jambs)
- Latch and strike plate screw set

With their metallic finish, the latch and strike plates ensure a clean and quality appearance when the Nexion is replaced with the new Yale Unity Entrance Lock. The latch and strike plates are designed to support the door position sensor and magnet. The three different strike plate sizes included in the Retrofit Kit provide the option to cater to multiple types of jamb thickness (35-45mm).

*Retrofit Kit not suitable for use on fire door applications.

Description	Part Number
Yale Unity Installation Template	YUR/TEMPLATE

YDM7220 Smart Mortice Lock

Yale takes the next step in providing you peace of mind when securing your belongings with the YDM7220 Smart Mortice Lock. Offering you various door access methods including fingerprint scan, personalised PIN code, RFID key tag or a physical key, there are now even more smart lock options to suit your home needs.

The Yale YDM7220 Smart Mortice Lock has an inbuilt door position sensor that checks the status of whether the door is open or closed. This avoids inadvertently locking your door while the door is open. With the scramble code feature, you can either enter a series of numbers at the beginning or after the pin code to ensure the real pin is not exposed. The safe handle button on the inside lever prevents small children from unintentionally opening the door.

The privacy switch brings enhanced security to you by disabling authentication methods (pincode, RFID tag, and fingerprints) from outside when you switch ON from inside. You will only be able to use the mechanical key (2 provided) to unlock when the Privacy mode is ON. 9V battery backup terminal is located at the bottom of the lock in case the battery runs flat, though with the low battery warning, this will be averted.

The Yale YDM series Rebate kit* offers customers the option to fit this lock with a set of rebated double doors.

Works with your Smart Home

The Yale YDM Home Module (included) allows users with a YDM series lock to utilise the functions and features of the Yale Home App.

Simply Install the YDM Home module into the back of an 7220 Lock and download Yale Home App.

Supported on YDM 7220/3109A Lock Series.

With Yale Home you can:

- Lock and unlock your door via your mobile device
- Grant access to others for one time access
- Grant access for a set period of time or a date range
- Keep track of visitor access
- Check the door status from your mobile device
- The Yale Connect Plus Bridge is required to enable the Works with Amazon Alexa and Google Home functionality, allowing you to control your lock with voice commands. Upgrade your YDM7220 lock with the Yale Connect Plus Wi-Fi Bridge** (Item code: AYR-BDG-CB2-ANZ, sold separately) to access your lock remotely, enjoy the full benefits through the Yale Home App, and seamlessly integrate voice commands with Alexa, Siri and Google Assistant.

YDM3109A Smart Mortice Lock

The Yale 3109A digital mortice lock is a truly exceptional product that seamlessly combines security with convenience. This lock provides users with a broad array of door access methods, including personalized PIN codes, RFID key tags, or a physical key, affording them the flexibility they require. The scramble code feature further elevates security levels by enabling users to input extra digits before or after the PIN code, effectively concealing the actual code.

In addition, the safe handle button feature helps prevent children from inadvertently opening the door, while the built-in door position sensor alerts users if the door is still open. The auto-lock sensor detects the door's status and promptly throws the bolt, preventing anyone from following a user into their home. The Privacy switch is a truly unique security feature that allows users to disable external authentication methods by switching ON from the inside, rendering it impossible to unlock the lock without employing the provided mechanical key.

The low battery warnings will notify users to change the battery, though in the case they forget, the 9V battery backup terminal located at the front of the lock, ensures that users are never left stranded. To amplify the product's versatility, the Yale YDM series Rebate kit* provides users with the option of fitting this lock with a set of rebated double doors, further heightening the product's effectiveness.

Works with your Smart Home

The Yale YDM Home Module (included) allows users with a YDM series lock to utilise the functions and features of the Yale Home App.

Simply Install the YDM Home module into the back of an 3109A Lock and download Yale Home App.

Assure Lever

Upgrade your existing lever or knob with the Assure Lever, a smart lever lock with a sleek keypad for key-free entry. Never worry about carrying or losing your house keys again! Create unique entry codes for friends and family and remove codes whenever you need to. It's great for side entry doors, garage entry, basement doors, home offices - super easy to use and installs in minutes with just a screwdriver on doors with a single hole (no deadbolt).

The Yale Assure Lever comes with the C4 Keyway, enabling customers to customise this lock keyed-alike.

Works with your Smart Home

The Assure Lever comes with a Yale Home module, allowing you to lock/unlock, share access, and see who comes and goes, all using your Yale Home App and Apple HomeKit at your door! For ultimate convenience, your Assure Lever will unlock automatically as you approach the door and relock once the door is closed! Plus, you can upgrade with the Yale Connect Plus Wi-Fi Bridge (sold separately) to access your lock remotely and enjoy voice assistant capability. Easily integrate it into your Google, Siri, Samsung, or Alexa-enabled smart home devices. The Assure Lever is also compatible with other Yale Modules (Z-Wave Plus and ZigBee*) to integrate into most home automation systems, allowing you to control and monitor the lock from anywhere in the world.

*Z-wave and Zigbee Modules are sold separately

Yale Home Module

The Yale Home module allows users with an Assure Series lock to utilise the functions and features of the Yale Home App.

In four simple steps, you can access the features within minutes:

Step 1: Install the Yale Home Module into the back of an Assure Lock

Step 2: Install the door sense to your door jam

Step 3: Download the Yale Home App.

Step 4: Upgrade with Yale Connect Plus Bridge* for remote access (optional)

The Yale Home module enables features such as 24/7 lock activity, auto unlock, and autolock. It is also compatible for use with the Yale Connect Plus Bridge* to gain the ability of remote access. Yale's door position sensor checks the status of the door and tells you if your door is securely closed and locked. This avoids inadvertently locking your door whilst the door is open.

Suitable for Assure series locks, this is a quick and simple solution to the first of your smart home devices or to add to an existing solution.

*Yale Connect Plus Bridge is sold separately

Features and Specifications

- Total control via the App
- Remote access
- Auto unlock/lock
- Door position sensor
- Tailor user access
- 24/7 Lock Activity trails

Supported on the Yale Assure Lock Series.

Yale Home App

Yale Home

Yale Home is Yale's global digital locking solution for the residential market. Yale smart locks can be controlled through the use of the Yale Home App, giving you total control over your lock. Lock and unlock your door, grant access to others and keep track of visitor access all via your mobile device.

With 24/7 lock activity, you can see who accessed your lock and when. Using Bluetooth, Wi-Fi, GPS and the Yale Home App, the auto unlock function unlocks your door as you approach.

Yale's Door Position Sensor checks the status of the door and tells you if your door is securely closed and locked. This avoids inadvertently locking your door while the door is open.

With a Yale lock connected to the Yale Connect Plus Wi-Fi Bridge* you can lock and unlock your door remotely and change PIN codes and lock settings remotely. By integrating the bridge into your home automation system, you can turn your lights on when your door unlocks or even play your favourite music.

The Yale Connect Plus Wi-Fi Bridge also enables voice assistant and can integrate into your Google, Samsung or Alexa smart home devices.

When connecting the Yale Smart Keypad* to your lock, you can lock and unlock your door via the keypad. Connected via Bluetooth to the lock, you can create unique entry codes to unlock your lock without a traditional key or phone. The keypad is easy to mount outside your door, without the need to hard-wire.

The Yale Home App is a seamless and simple method of controlling and monitoring your lock for peace of mind and security.
