

CARBINE MECHANICAL LOCK SERIES

CARBINE
MECHANICAL LOCK

CDL-7100HD

The Carbine CDL7 digital further improves the **quality & security** of mechanical digital locking.

+ Door thickness:
Suits 32mm-54mm

The Carbine design team has taken all the best features of the NK2000 series and innovated even further. The CDL7 series features a new easy-to-use code change system on the rear of the pad. Simply flick switches instead of changing discs. This has also allowed an improved internal locking mechanism to prevent costly breakdowns. The addition of ball bearing-style push buttons also increases the resistance to code manipulation. The CDL7 series is available in various models to suit lockset, deadlatch, mortice lock and dual pad applications.

Perfect for
Storerooms
& Retail

MECHANICAL LOCK

CDL-7200HD

New **dual lever** models.

- + Available in keypad, dual keypad, or mortice and deadlatch models.
- + Lever handle on both sides for ease of use.
- + BCA compliant lever handles.
- + Clutching lever feature.

- + Higher quality, harder wearing internal code components.
- + Improved product life and code pad performance.
- + Cycle tested to 100,000 openings.
- + Greatly improved weather resistance - 240 hour salt spray tested.
- + Provides an all in one model with heavy duty performance and weather resistance.

CARBINE
MECHANICAL LOCK

NK2000

A robust code changeable mechanical digital lock & is one of the **most flexible** mechanical digital locks on the market.

+ Door thickness:
Suits a 45mm thick door when using trim plates, suits 50mm thick doors without use of trim plates.

Also available
in Dual Pad
Model

There are many different models to choose from. There is the NK2000 which fits on to timber doors with an internal lever handle. The NK2000-2 model will fit with Lockwood 002 deadlatches and with either Legge L9MFS or Lockwood 3572 commercial mortice locks (internal furniture not included). You can also purchase a dual pad model (NK2000-KDSC) if a digital pad is required on each side of the door.
