Value Range Padlocks

110 Series Brass Body Padlocks

The Lockwood Solid Brass 110 Series Padlocks are designed for barrier and deterrent level protection in applications such as school lockers and letter boxes.

Features

- Pin tumbler mechanisms
- Self-latching shackle function
- Single locking on 20 and 25mm padlocks
- Double locking on 30, 35 and 40mm padlocks

Product Details

Materials	Body: Brass. Shackle: Hardened steel.
Function	Spring loaded shackle with latching function where the key can be removed with the shackle in the open position.
Finish	Body: Natural material. Shackle: Chrome plate.
Shackles	Available in a variety of diameters and lengths. See specifications section for available options.

Standards and Compliance

UP TO GRADE SP4

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade range up to Grade 4.

INDOORS

Corrosion Resistance Rating C2: Environments that are normally dry, including the majority of interiors.

SHELTERED

Corrosion Resistance Rating C3: Environments that are sometimes damp in the majority of normal rural and suburban localities, including interiors where condensation may occur.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

Value Range Padlocks

110 Series Brass Body Padlocks

Value Range Padlocks

141 Series Combination Padlock

The Lockwood 141 Series Padlock is a 50mm stainless steel dial type combination padlock with key override. Designed as basic protection for barrier and deterrent applications such as school lockers where access by authorised staff is required.

Features

- Key override for immediate access by authorised staff
- Steel latch mechanism
- Brass 4 pin tumbler mechanism
- Brightly coloured dial for easy identification
- Positive three digit dialling gives maximum combinations
- Anti manipulation feature standard
- Automatic combination scramble when shackle is closed to prevent unauthorised reopening of padlock
- Keying and system management using Lockwood ProMaster software
- Combination code charts supplied with every order
- Available in RCKA (Random Codes, Keyed Alike) only

Product Details

Materials	Body: Stainless steel. Shackle: Hardened steel.
Function	Three code dial combination. Automatic combination scramble when shackle is closed to prevent unauthorised reopening of padlock.
Finish	Body: Natural material. Shackle: Chrome plate.
Shackles	8mm diameter, 22mm long shackle only.

Note: Minimum order quantity and minimum pack size 50

Standards and Compliance

SP3

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade 3.

Corrosion Resistance

Rating C3: Environments that are sometimes damp in the majority of normal rural and suburban localities, including interiors where condensation may occur.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

High Security Padlocks

High Security Padlocks

120N Series Brass Body Padlocks with Silicone Jackets

The 120N Series Padlock range includes 14 different models, with single, twin and quad packs (keyed alike), as well as extended shackle lengths for selected models.

All padlocks in this range come complete with jackets made from a tough silicone material which is weather resistant and UV stable to resist the impact of harsh environments.

The jackets also provide protection for both the padlock and the object to which it is attached.

The 120N padlocks are suitable for general purpose applications providing for a broad range of applications.

Features

- Pin tumbler locking
- Self-latching shackle function
- Multipacks (keyed alike) on some 30mm and 40mm variants

Product Details

Materials

Body: Brass.
Shackle: Hardened steel.
Cover: Silicon

Function

Spring loaded shackle with latching function where the key can be removed with the shackle in the open position.

Finish

Body: Natural material.
Shackle: Chrome plate.

Shackles

Available in a variety of diameters and lengths.
See specifications section for available options.

Standards and Compliance

SP2-6

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade range from 2-6.

Corrosion Resistance

Rating C3: Environments that are sometimes damp in the majority of normal rural and suburban localities, including interiors where condensation may occur.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

High Security Padlocks

120N Series Brass Body Padlocks with Silicone Jackets

Specifications

Part Number	Dimensions (mm)						Physical Security Rating	Corrosion Resistance Rating

High Security Padlocks

334B Series Brass Body Padlocks

The Lockwood 334 Series Brass Body Padlock range features shackles suitable for commercial and industrial high security and high corrosion applications.

Features

- Double ball locking
- Stainless steel shackle models
- Standard as latching function
- Can be converted to deadlocking (key retained) by simply relocating the cam plate pin in the cylinder assembly
- Rapid change shackle

Product Details

Materials	Body: Heavy duty, brass extrusion. Shackle: Boron steel.
Function	Spring loaded shackle, available with latching function where the key can be removed with the shackle in the open position (L) or deadlocking function where the key is retained and can only be removed with the shackle in the locked position (D).
Finish	Body: Natural material. Shackle: Chrome plate.
Cylinder	Rekeyable 334 type padlock cylinder. Inline pin cylinders can be keyed to 5 or 6 pins.
Shackles	8.7mm diameter, 19, 25, 38, 48 & 90mm lengths.
Special Keying	Locks can be keyed to a number of controlled and / or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication and can also include specially designed keying systems such as master key systems. This allows for different levels of mechanical access control. Bulk Locksmiths versions are available.

Note: Custom marking is available. Pricing and availability on application.

Standards and Compliance

SP5-7

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade range from 5-7.

Corrosion Resistance

Rating C4: Environments that are often wet and/or subject to slight pollution by sulphur dioxide, acid, alkali or salt, including some particularly damp interiors and the majority of exterior environments.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

Materials	Body: Steel. Shackle: Molybdenum steel.
Function	Spring loaded shackle, available with latching function where the key can be removed with the shackle in the open position (L) or deadlocking function where the key is retained and can only be removed with the shackle in the locked position (D).
Finish	Body: Chrome plate. Shackle: Chrome plate.
Cylinder	Rekeyable 334 type padlock cylinder. Inline pin cylinders can be keyed to 5 or 6 pins.
Shackle	11mm diameter, 25 & 50mm lengths.
Special Keying	Locks can be keyed to a number of controlled and / or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication and can also include specially designed keying systems such as master key systems. This allows for different levels of mechanical access control. Bulk Locksmiths versions are available.

Note: Custom marking is available. Pricing and availability on application.

Standards and Compliance

SP8

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade 8.

Corrosion Resistance

Rating C3: Environments that are sometimes damp in the majority of normal rural and suburban localities, including interiors where condensation may occur.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

Maximum Security Padlocks

356M Series Stainless Steel Body Padlocks

The Lockwood 356 Series Padlocks are a range of padlocks with steel and stainless steel bodies and shackles designed for maximum security and high corrosion resistance including commercial and industrial applications.

Features

- Double ball locking
- Extended shackle models
- Standard as deadlocking (key retained) function

Product Details	
Materials	Body: Stainless steel. Shackle: Stainless steel.
Function	Spring loaded shackle, available with latching function where the key can be removed with the shackle in the open position (L) or deadlocking function where the key is retained and can only be removed with the shackle in the locked position (D).
Finish	Body: Natural material. Shackle: Natural material.
Cylinder	Rekeyable 334 type padlock cylinder. Inline pin cylinders can be keyed to 5 or 6 pins.
Shackle	11mm diameter, 25 & 50mm lengths.
Special Keying	Locks can be keyed to a number of controlled and / or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication and can also include specially designed keying systems such as master key systems. Please note: In order to simplify the process of ordering keyed alike and master keyed padlocks, the keying component is incorporated into the product number as shown in the diagram. This means there is no longer a requirement for separate keying charges on padlocks.

The master key MK code covers the following keying options: master keyed, grand master keyed and maison keyed.

When ordering MK padlocks please specify the keying details.

Part number convention is for reference only.

Padlock Accessories

Padbolt

Lockwood Padbolts are designed for both barrier and deterrent applications.

Features and Specifications

- Hardened steel shackle cover for added strength
- High cut resistant hardened steel construction
- Tamper resistant fasteners included
- 12.5mm bolt diameter

Security

Security Rating 7

Corrosion Rating 3

The security rating was achieved using the fasteners supplied in the pack. The use of fasteners other than those supplied may affect the security of this product.

Pack Variations

Available in display pack only.

Choosing the Right Padlock

For the best results it is recommended that a Lockwood padlock with the same security rating as the accessory is selected.

When the padlock and accessory are combined the lower of the two respective ratings will apply.

Product Details

Functions	Durable hardened steel
Materials	Corrosion resistant black coating

Standards and Compliance

SP7

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade 7

Corrosion Resistance Rating C3: Environments that are sometimes damp in the majority of normal rural and suburban localities, including interiors where condensation may occur.

Designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

Safety Lockout Padlocks

214 and 215 Series Aluminium Body Padlocks

The Lockwood 214 and 215 Aluminium Series Padlocks are a range of durable, rugged and lightweight 40mm aluminium body padlocks with full commercial grade special keying. The range has been specifically designed to meet the requirements of commercial and industrial applications. Along with a range of up to eight clearly identified coloured jackets, it is ready to be custom marked to make lock identification easy.

Features and Specifications

- Self latching double ball locking
- Can be converted from self latching to deadlocking (key retained) by simply relocating the cam plate pin in the cylinder assembly
- Covers available in eight easily identified colours.

Product Details

Materials	Body: Heavy duty, aluminium body extrusion. Shackle: Stainless steel.
Function	Spring loaded shackle, available with latching function where the key can be removed with the shackle in the open position (L) or deadlocking function where the key is retained and can only be removed with the shackle in the locked position (D).
Finish	Body: Red anodized aluminum. Shackle: Natural material.
Cylinders	Rekeyable 334 type padlock cylinder. Inline pin cylinders can be keyed to 5 or 6 pins.
Shackles	214 Model: 5.0mm diameter, 19 & 50mm lengths. 215 Model: 6.4mm diameter, 19 & 50mm lengths.
Special Keying	Locks can be keyed to a number of controlled and / or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication and can also include specially designed keying systems such as master key systems. This allows for different levels of mechanical access control.

Bulk Locksmiths versions are available.

Note: Custom marking is available. Pricing and availability on application.

Standards and Compliance

SP3-6

Physical Security grades are employed for padlocks. These grades are defined in part by the effective differs and key combinations. Padlocks Physical Security (SP) grade range from 3-6.

OUTDOOR

Environments that are often wet and/or subject to slight pollution by sulphur dioxide, acid, alkali or salt, including some particularly damp interiors and the majority of exterior environments.

All products are designed and tested to the Australian Padlock Standard AS4145.4 2002 and are rated for both security and corrosion resistance.

215P Series Plastic Body Padlocks

The Lockwood 215P Plastic Body Series Padlocks have been specifically designed for the electrical and mining safety lockout industries. When specified with a polymer shackle the padlock becomes completely non-conductive allowing for safety lockout within electrical applications.

Features and Specifications

- Excellent corrosion resistance
- All components are non-sparking
- All components are non-magnetic
- Meets OH&S guidelines of one employee, one padlock and one key
- Available in six colours
- Includes write on “Danger” label

Product Details	
Materials	Body: Plastic. Shackle: Plastic or brass.
Function	Spring loaded shackle with deadlocking function where the the key is retained and can only be removed with the shackle in the locked position.
Finish	Body: Coloured plastic. Shackle: Natural material.
Cylinders	Rekeyable 334 type padlock cylinder. Inline pin cylinders can be keyed to 5 or 6 pins.
Shackles	Available in 6mm diameter, 50mm long, brass and polymer shackles.

225 Series Padlock

The Lockwood 225 Series Padlock is a zinc diecast padlock with a powdercoated finish.

The 225 padlock is primarily used with the 003 key code for the fire industry.

The padlock is also available with a brown powder coat finish for use in other applications.

Features and Specifications

- Powder coated red body
- Hardened steel chrome plated shackle

Product Details

Materials	Body: High purity, diecast, zinc alloy. Shackle: Hardened steel.
Function	Spring loaded shackle with latching function where the key can be removed with the shackle in the open position.
Finish	Body: Red powder coat (003 version) or Brown powder coat. Shackle: Chrome plate.
Cylinder	Integrated 5 disc barrel.
Shackles	6.4mm diameter, 19mm long.

312 Series Padlocks

The Lockwood 312 Series Safety Lockout Padlocks are a durable and rugged brass padlock that has been specifically designed to meet the requirements of safety lockout applications.

Multiple departments or jobs can be easily identified using one of the jacket options. Laser etching is also optional for individual identification when using the windowed jacket.

Features and Specifications

- Primarily used for safety lock out applications
- 6 pin tumbler mechanism
- Self latching or deadlocking (key retained)
- Dual shackle locking points
- Coloured covers available for easy identification.

Product Details

Materials

Body: Solid brass.
Shackle: Stainless steel.

Function

Spring loaded shackle, available with latching function where the key can be removed with the shackle in the open position (L) or deadlocking function where the key is retained and can only be removed with the shackle in the locked position (D).

Finish

Body: Natural material.
Shackle: Natural material.

Cylinders

Integrated cylinder, 6 pins.

Shackles

4.8mm diameter, 19mm, 38mm and 50mm lengths.

Note: Custom marking is available. Pricing and availability on application.

312 Safety Lockout Hasp

Lockwood's unique patented Safety Lockout Hasp design provides protection for various portable installations suitable for both single and multipoint* locking applications. This product provides maximum protection when used in conjunction with Lockwood's 312 Series padlocks and ensures equipment can be isolated and not activated again until the repairs or maintenance are completed.

The locked out device cannot be reactivated until all workers have signed off on their portion of the project and removed their padlock from the hasp.

Lockwood's guarantee of quality means that you can be confident in your choice of Lockwood Safety Lockout products.

*When used in conjunction with 312 cables sold separately.

Product Details

Materials	Shackle: Stainless Steel.
	Locking points: Stainless Steel.
	Rivets: Stainless Steel.
	Spring: Stainless Steel.
	Body: Galvanised Steel.
Functions	Single action shackle release trigger.
	Piggy back function.
Finish	Powdercoat red.
Accessories	Red PVC coated cables are available separately for multi point locking in lengths of 1.5m, 6m, and 10m.

312 Safety Lockout Hasp

Features and Specifications

- Multi-function Safety Lockout Hasp with the unique design cable locking feature
- Hardened Stainless Steel hasp
- Self-latching
- Single action shackle release trigger
- Six padlock holes accepts 312 Series padlocks
- Heavy duty stainless steel return spring
- Piggy back function
- Stainless steel body rivets
- Highly visible red powder coat finish
- Multi point locking (when used in conjunction with cable)

Dimensions

312 Covered Supervisors Hasp

This product is specifically designed for use with Lockwood's 312 Series padlocks and ensures equipment can be isolated and not activated again until repairs or maintenance is completed.

The locked out device cannot be reactivated until the Supervisors Padlock is unlocked. The Supervisors padlock is only accessible after all workers have signed off on their portion of the project and have removed their padlock from the hasp.

The hasp will lock over a 312 Series Padlock with 10 lockout positions and a window to view the laser etched details on the supervisor's padlock. It is available in two colours, yellow and blue to represent day shift and night shift workers.

Lockwood's guarantee of quality means that you can be confident in your choice of Lockwood Safety Lockout products.

Features

- Laser etched details window
- 10 lock out positions
- Powder coated yellow and blue finish options
- Durable zinc plated steel construction
- Cut-outs for reduced weight

*312 padlocks sold separately.

312 Series Safety Lockout Range - Accessories

Padlock Holder for 4 Padlocks

Part Number	312HOLDER/4
Finish	Black

The Lockwood 312 Holder/4 has the capacity to hold four 312 Lockwood Padlocks (19 mm – 80 mm shackle), a retractable 312 Keyline and 312 Series Safety Jaws.

The carry case is designed to be easily fitted onto your belt. The 312 Holder also includes a clear face compartment which makes identification easy.

Note: Padlocks and Accessories are ordered separately.

Padlock Holder for 6 Padlocks

Part Number	312HOLDER/6
Finish	Black

The Lockwood 312 Holder/6 has the capacity to hold six 312 Lockwood Padlocks (19 mm – 80 mm shackle), a retractable 312 Keyline and the 312 Series Safety Jaws.

The carry case is designed to be easily fitted onto your belt. The 312 Holder also includes a clear face compartment which makes identification easy.

Note: Padlocks and Accessories are ordered separately.

Retractable Key Holder

Part Number	312KEYLINE
Finish	Chrome Plate/Black

This compact retractable key holder incorporates a spring loaded mechanism, a robust steel cable line and key ring.

The built in clip allows easy fitting onto the 312 Holder, or can be used independently. The 312 Keyline ensures keys are easily accessible when needed.

Note: Padlocks and Accessories are ordered separately.

312 Series Safety Lockout Range - Accessories

Safety Lockout Jaws

Part Number	Description
312JAWS	25mm - 6 Holes
312JAWS/7	25mm - 7 Holes

The safety lockout jaws ensure that machinery stays 'locked out' until each person removes his/her padlock from the hasp. This prevents any accidental re-energising of machinery before crews have completed their work.

The 312 Jaw holds up to six 312 padlocks and is made from hardened steel with a vinyl coating.

Note: Padlocks and Accessories are ordered separately.

Trailer Air Coupling Locks

The Lockwood Air Coupling Locks have been designed for the securing of Truck (Trailer) and industrial compressed air line applications. When attached to the air line this product provides security and safety.

Security: Whereby the air brakes air line fitting is effectively sealed when the lock is attached, preventing connection to the opposing fitting. In the case of a Trailer application this reduces the risk of the trailer being connected to a truck without authorisation.

Safety: In an industrial application the sealing of the air line can reduce the risk of an accidental connection of equipment when shut down for maintenance etc.

The Lockwood Air Coupling Lock range consist of two series, the AL Series and the TL Series.

AL Series

The AL Series comes with an integrated cylinder that can be keyed to most restricted key systems.

It is available in two models to suit both the ½" NPT female air coupling and the ½" NPT male air coupling.

TL Series

The TL Series is locked with a padlock. The locking point allows for use of a padlock with under 10mm shackle diameter.

It is available in two models to suit both the ½" NPT female air coupling and the ½" NPT male air coupling.

Air Coupling Types

Air Coupling Types

Air Couplings come in different sizes, the AL & TL Series are designed to work with ½ inch couplings;

- 1/2" NPT male coupling = AL Series 63 or TL Series 1/2IN
- 1/2" NPT female coupling = AL Series 81 or TL Series 28MM

Note: Air Couplings are not supplied.

½" NPT male thread coupling

½" NPT female thread coupling

AL Series

AL Series

The AL Series comes with an integrated cylinder that can be keyed to most restricted key systems.

It is available in two models to suit both the ½" NPT female air coupling and the ½" NPT male air coupling.

Product Details

Dimensions

Diameter: 45mm.
Length:

- AL Series 63 - 96mm.
- AL Series 81 - 114mm.

Materials

Inner Sleeve: Mild steel.
Outer Sleeve: Case hardened steel.

Function

Spring loaded function allowing for quick snap-on attachment to ½ inch air coupling fittings.

Locked and unlocked by integrated cylinder. Key retained in unlocked position.

Finish

Chrome Plate (CP).

Cylinder

AL Series - 577 Synergy 3500 Series dual access lower cylinder.

Special Keying

Locks can be keyed to a number of controlled and/or specially keyed systems. These range from legally protected keys to protect against unauthorised duplication and can also include specially designed keying systems such as master key systems. This allows for different levels of mechanical access control.

AL Series

AL Series 63

AL Series 81

Part Numbers

Part Number	Description	Coupling Type
AL1/2/63MM##	AL Series 63 Air Coupling Lock	½" NPT male thread coupling
AL1/2/81MM##	AL Series 81 Air Coupling Lock	½" NPT female thread coupling

Note: ## in part number is exchanged for keying type.

KD = Keyed to Differ (Standard C4 profile 6 pin)

KA = Keyed Alike (Standard C4 profile 6 pin)

MK = Master Keyed (Standard C4 profile 6 pin)

TL Series

TL Series

The TL Series is locked with a padlock. The locking point allows for use of a padlock with under 10mm shackle diameter.

It is available in two models to suit both the ½”NPT female air coupling and the ½” NPT male air coupling. •

Product Details	
Dimensions	Diameter: 38mm. Length: <ul style="list-style-type: none"> • TL Series 1/2IN – 59mm. • TL Series 28 – 79mm.
Materials	Inner Sleeve: Mild steel. Outer Sleeve: Case hardened steel.
Function	Spring loaded function allowing for quick snap-on attachment to ½ inch air coupling fittings.
Finish	Satin Chrome Pearl (SP).
Locking	The TL Series is locked by padlock. Padlocks are available separately and not included. Suits padlocks with a shackle diameter of under 10mm and minimum clearance height of 38mm.

TL Series

TL Series 1/2IN

TL Series 28MM

Part Numbers

Part Number	Description	Coupling Type
TL1/2IN	TL Series 1/2IN Air Coupling Lock	1/2" NPT male thread coupling
TL28MM	TL Series 28MM Air Coupling Lock	1/2" NPT female thread coupling

Note: Padlocks are available separately and not included.

ASSA ABLOY

Lockwood is the leading brand in the Australian locking industry. With an established reputation for high quality products, this iconic brand provides a wide range of locking solutions to residential housing, commercial building and industrial application markets. Lockwood is supported by an extensive distribution and after-sales support network. Our customers include retailers, architects, trade and industrial personnel, locksmiths and security dealers.

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.

ASSA ABLOY is represented in all major regions, in both mature and emerging markets, with leading positions in Australia, Europe and North America.
