Fire Rated

STRIKE SHIELDS

SPECIFICATIONS

The Sabre range of Strike Shields are ideal products to include when looking for added security especially on opening outward doors. Opening outward doors expose the latch or bolt of the lockset which can be prone to attack from unwanted intruders. The Sabre Strike Shield offers protection to this area of the latch and also the lock from attack. There

are various types of Strike Shields available depending on the lock type that has been installed. All Sabre Strike Shields are made from marine grade 316 stainless steel to ensure the product can withstand the varying environments we have in Australia. Testing has also been approved for use on fire doors.
