

# Kilargo IS9050 Finger Guard - Clear Anodised Aluminium

LO-IS9050

## PRODUCT OPTIONS

## DESCRIPTION

Trapping fingers in hinged doors can cause horrendous injuries. The risk is especially high in locations where young children are present; ie, child care centres, schools, restaurants, fast-food outlets, etc.

The finger guard seals provide the shield. These seals can provide protection on both sides of the door by using the IS9050 or IS9055 on the hinge knuckle side and the IS9070 on the hinge cavity side (opening side) of the door.

### Standard Length

2250mm

2500mm

Also available in 250mm increments from 1000-3000mm (special order)

### Finish

Silver anodised aluminium with grey PVC cover strip and black gasket

Also available Black anodised aluminium with black PVC cover strip and black gasket (special order)

## SPECIFICATION
