PRODUCT OPTIONS

Door Seal Length: 450mm
610mm
820mm
920mm
1070mm
1220mm
1500mm

DESCRIPTION

A heavy duty, automatic door bottom seal which can be face-fixed or fully mortised into the bottom edge of single action doors. The seal has a spring loaded mechanism which lifts the seal clear of the floor as soon as the door is opened. Pressure against the door jamb on the adjustable brass strike button operates the seal automatically. Face-fixed: The seal is fixed to the face of the door bottom using the long fixing screws provided. (see detailed fitting instructions). The reversible aluminium top cover plate conceals the fixing screws and provides an aesthetic, architectural finish. A set of screw-fixed nylon end plates ensure longevity of the seal mechanism. Fully-mortised: When the seal is to be fully-mortised, the seal (minus the top cover plate) is mounted into a 54mm deep x 22mm wide machined groove and screw-fixed back into the door stiles via stainless steel end plates, holding the seal in place. The seal contains a high efficiency mechanism to assist with the closing force requirements detailed in AS1428/1 (Design for Access and Mobility).

Gap Size

Min. 3mm / Max. 15mm

Standard Lengths with Maximum Cut-back sizes

450mm seal cuts to 275mm
610mm seal cuts to 450mm
