

Lockwood Non-Electric Strike - (Padde NE)

SKU LW107501-090

MPN 107501-090

DESCRIPTION

The Lockwood Non-Electric Strike is used with the LW8530-305SC double bevel latch on E Core fire doors that require a push/pull function.

The profile of the Lockwood non-electric strike has the same dimensions as a universal strike plate: 70mm height x 29mm width and 55mm between centres of fixing holes. This allows the Lockwood non-electric strike to be installed directly into a universal strike preparation with minor depth adjustment to the doorframe.

Fire tested up to 4 hours

Australian designed and manufactured

Full stainless-steel keeper and body

Corrosion resistant

Easily installed

Low maintenance

Historical brand names used are Padde, Tyco and Trimec

A very important part of an E Core double fire door assembly when certification is required
