Antimicrobial coating

Antimicrobial Features

Antimicrobial describes something that can resist and prevent the growth of microbes including bacteria, fungi and mould. Antimicrobial protection significantly reduces the levels of microbes on a protected surface by up to 99.99%.

The in-built antimicrobial protection means the bacteria cannot survive. Once added to a product the antimicrobial technology starts to work immediately, tests have shown that up to 80% of microbial contamination will be killed within just 15 minutes and over 99% in 2 hours.

Mounting/Specify

Concealed screw fix

Surface Mounted

Designed for bathrooms

Slide Lock Features

Unique easy-glide slide lock for restricted hand mobility, limb loss and hygiene protection

Raised directional arrows for vision impaired

Satisfies Disability Standard AS1428.1 for ambulant cubicle specification only
